BALLERSTAEOT

Our expertise and reliability have made us a leading German system technology provider.

We are committed to providing perfect products and customer-oriented solutions.

We offer innovative solutions that are best suited to our customers' needs

We have a suitable product for all requirements. Our sealing systems primarily ensure

- Absolute tightness
- Protection against external influences
- Reliable quality and tamper-proof
- Complete customer satisfaction.

We are proud to have more than 1,000 satisfied customers worldwide

The large number of **satisfied customers** in the cosmetics, food, pharmaceutical and chemical industries bear testimony to **BALLERSTAEDT quality**.

What makes us unique

- Sealing systems from one source
- More than 75 years' experience
- Export to over 50 countries
- Customised solutions
- More than 40 material qualities always available
- Highly innovative.

We are ISO 9001 and HACCP certified.

Sustainability is important to us

Sustainable actions are part of our corporate identity. That is why we generate most of the energy we need from our own photovoltaic systems. When purchasing new company vehicles, alternative drives have priority.

The majority of our seals are made of aluminium. As a packaging material, it ensures absolute protection against external influences such as light, foreign odours or oxygen. Your products are protected and the shelf life extended. Aluminium is fully recyclable without loss of quality.

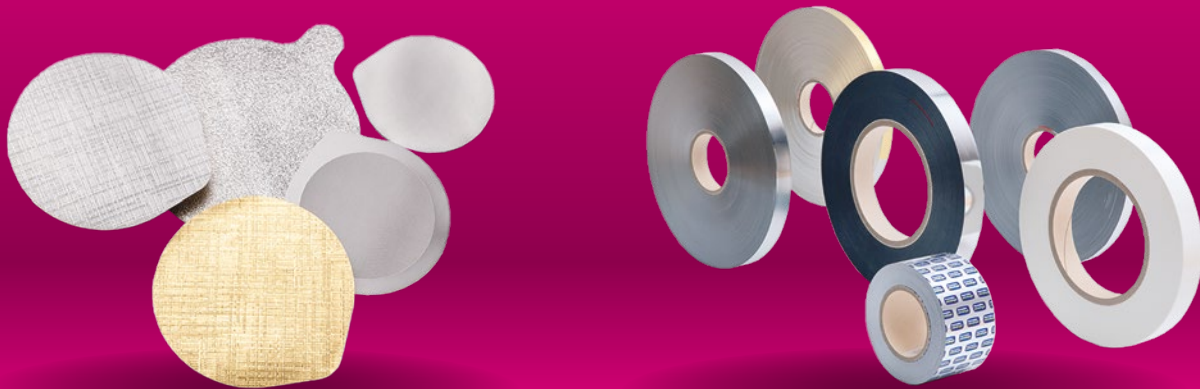

For us, the development of a product is only complete when we have achieved exactly what our customers require. You and your wishes are the focus of our attention.

The way your products are rated starts with our seals

Day after day, consumers open countless packages and containers. Evaluation of the product quality starts now: How easy is it to handle? How are the contents protected in terms of reliability and hygiene? How sensibly is the material used? The overall impression is decisive.

Our customers profit from our expertise. We know the market and are experts in our field. We are the professionals for all protective solutions. For every requirement and for every product we find the optimal seal. We advise and support our customers – from the initial idea to market maturity.

Flat Seals

- Suitable for plastic, glass, ceramic and metal containers etc.
- In different shapes, sizes, material specifications and designs
- Diverse embossing options available, individual design possible.

Reel material

- All sealing materials are also available on reels
- Specific solutions for tube sealing
- Embossing and printing possible.

Our innovative digital printing machine opens up new possibilities

- Customisable seals
- Short delivery time
- High flexibility
- Printing of small quantity
- Low migration ink
- No printing tool cost
- Multi-colour print without surcharge.

Preformed aluminium seals

- Reliable protection, also for aggressive products
- Easy manual handling, self-centering
- Available in various shapes, sizes and materials
- Individual embossing and printing possible.

One-piece induction liners

- Available in various shapes and sizes
- Peelable
- Special quality for induction sealing of glass containers available.

Pressure sensitive liners

- Self-adhesive, no sealing machine required
- Suitable for dry filling goods.

Cosmetics

A small seal with a great effect on beauty and care

We ensure quality and long shelf life of sensitive cosmetics.

Your benefits at a glance

- Tamper-proof
- Protection against light, oxygen, germs and foreign odours
- Absolute tightness
- Exclusivity through individual print and decoration
- Easy to peel off.

We make your products more attractive with an aesthetically appealing sealing system to provide a high-quality end product.

Food

Food products require maximum protection

Our material specifications are approved for direct contact with food. They comply with current EU and FDA directives.

Your benefits at a glance

- Digital print, even in small batches
- Pasteurisable, sterilisable and breathable seals
- Protection against external influences
- Residue-free removal
- Special shapes and designs.

Our sealing systems provide maximum protection for your products and extend the shelf life.

Pharmaceuticals

Reliable protection for drugs and medicines

Pharmaceutical preparations are subject to the most stringent protection and hygiene requirements. We meet these special quality requirements with our sealing systems.

Your benefits at a glance

- Digitally printable blister foil and seals
- Special shapes and sizes.

We specialise in customised solutions for the protection of drugs and medicines using tamper evident seals.

Chemicals

Proven safety for chemicals

Materials science is our know-how. The packaging of chemical substances is subject to the highest requirements. We ensure absolute tightness, even under the most demanding conditions.

Your advantages at a glance

- Use of special, product-resistant laminated foils
- High puncture resistance
- Peelable and strong-weldable specifications.

We offer the optimal seal quality for every requirement to protect your contents and the environment.

PolySeal Mano

innovative economic
manual sealing device

PolySeal Vario Twin

semi-automatic foil
application and sealing device

BaCo 2400

fully automatic filling,
sealing and capping system

Conductive sealing devices and systems

Our devices meet high quality standards. We provide customised solutions to suit all requirements. We offer a large portfolio of devices – from manual and semi-automatic sealing devices to fully automatic filling, sealing and capping systems. We ensure user-friendly setup and easy handling.

For sealing glass, metal and ceramic containers – we offer a special contact induction sealing technology.

As system provider with longtime experience, we grant

- To select suitable packaging materials
- Demand-oriented machines and sealing units
- Competent advice
- Comprehensive range of services.
