Lifting boats, that's what we do!

## Lifting boats, that's what we do!

The boat lifts are suitable for every location and every boat.

### Why buy a boatlift:

- No need for antifouling.
- No damage through waves and storm.
- No undesirable growth to the underwater ship.
- No corrosion risk through electrolysis hazard.
- Extension of the sailing season.
- Summer and winter storage.
- Good theft protection.
- Value retention of your ship.
- Very low maintenance because all the technology is out of the water.
- Very long life span through the use of saltwater-resistant materials.

Lifting boats, that's what we do!

We weld all components that are not adjustable, which prevents premature loosening of parts and there is no contact of dissimilar metals in a salt-water environment.

The boatlift drive is obtained by the Sea-Drive transmission. This patented drive is very powerful, almost noiseless and very maintenance low. In addition to the correct technical operation we also foresee in the need for a specific designed "bunk-set" that ensures correct and safe lifting. This bunk-set respects the structural integrity of your boat.

Tornado boatlifts: we enclose our hydraulic shafts in our exclusive Air Bellow. The 'Air Bellows' prevent any harmful particles and marine growth from damaging the hydraulic cylinders, seals and shafts. Features: Hardened Stainless Axles with Nylatron Sleeves, Long Range Wireless Remote With 2 Transmitters, Marine Grade Aluminum & Stainless Steel Construction, Aluminum Bunks With Rubber Capped Adjustable Inserts, Hydraulic Cylinders with Stainless Steel Shafts.

**The Elevator Boatlifts** are the solution for narrow canals, embankments and locations where pilings cannot be used. Pending on the location we build these in an angle of 90°, 45° or 22°. Capacities from 900 kg to 18.000 kg

**The 4-6-8 piling Boatlift** units are traditional shafted beam boat lifts. Capacities from 2250 kg to 100.000 kg

**Tornado Boatlifts** the free standing boatlifts are designed for fresh and salt water, with the best warranty on both frame and hydraulics. Capacities from 900 kg to 8100 kg

**Call or e-mail us!**

**Floating Boatlift** has an industrial and robust design. The boatlift is made out of durable materials (Polyethylene PE100, hot dipped steel and stainless steel). Lift operation is achieved by air displacement in and out of the PE Floats. Capacities 2200 to 30.000kg.

**The Boathouses** are build and designed up to customer request and they provide in the most optimal way of yacht storage and use in the world. The boathouses are completely built with the highest quality materials that foresee in a very long lifetime, maximum comfort in use and exceptional safety. The boathouses can be integrated with a boatlift.
